

# knowledgeBase

In your initial report for knowledgeBase, the following items need to be included along with a front cover page

## 1 Document Version

## 2 Team Information

- a) Role of each member
- b) Contact Info

## 3 Description of project

- a) Technical assumptions
- b) Non Technical assumptions

## 4) Provide a high level overview of the routes , controllers, view, models in a tabular format

Example

### Routes

/user/Profile/1	This route will be linked to the Profile Controller method getProfile
/user/message/1	.....

### Controller(s)

<b><u>ProfileController</u></b>	Responsible for adding / deleting new users in the applications
<u>Methods</u>	
getProfile	Takes the route param and fetches the requested user from DB, passes the info to the profileview
deleteProfile	Takes .....
<b><u>MessageController</u></b>	.....
<u>Methods</u>	
getMessages	.....

### View(s)

user	Shows info related to the current logged in user, his post, messages ..
message	.....

For the Models, present a list of tables you will likely end up with and the relationship between the tables

Example

User	<b>Id</b> (Number) Primary Key Name (String) Age (Number)
Products	<b>Id</b> (Number) Primary Key Name (String) Description (String)
Orders	<b>Id</b> (Number) Primary Key <u>user_id</u> (Number) Forgein Key – User Table <u>product_id</u> (Number) Forgein Key – Products Table

5 High Level Schedule

6 Potential Risks and issues

7 Testing
